© 2009 SANYO North America Corporation.

*As of the scheduled release date of May 29, 2009, for 2 lamp, SXGA+/Full HD, 1 chip DLP® projector.

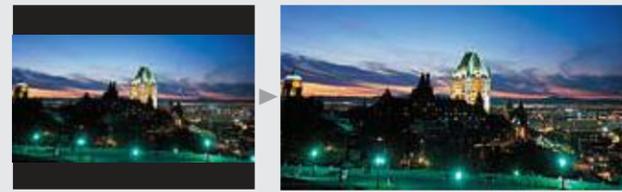

Advanced Technologies for Professional Use. Superb Image Expression with Flexible Installation and Easy Maintenance.

Higher Brightness and Superior Images

True Full HD Resolution

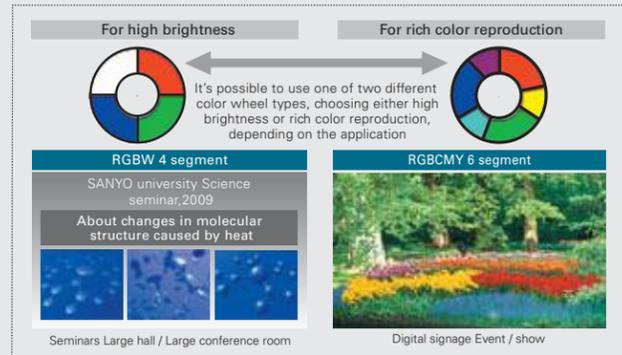

The PDG-DHT100L employs a DMD panel (16:9 aspect ratio). With 1,920 x 1,080 pixels in the panel, the PDG-DHT100L can project native HDTV 1080p signals in full resolution. DMD Panel helps convey the ambience in a scene with such exceptional fidelity. Full HD goes beyond conventional technology to reproduce images that are vibrantly alive and rich in emotion.

Industry's Brightest*1 7,500 lumens and Rich Color Reproduction

A twin color wheel system makes it possible to achieve both high brightness and high color reproduction that is accurate in image signal. In addition, the user can change color wheel to fit the application. The 4-segment color wheels team up with two high-output 330-watt lamps to achieve up to 7,500 lumens*1 of brightness in our 2-lamp, SXGA+, 1-chip DLP® projector. Or you can choose the 6-segment color wheels for even richer, purer color reproduction.

*1 As of the time of sales at the end of May 27, 2009 for 2-lamp, SXGA+, 1-chip DLP® projectors.
*PDG-DHT100L is 6,500 lumens

High Contrast 7500:1

This advanced optical system achieves high contrast*2 to project high-quality images with rich black reproduction, maximizing the quality of the video signals.

*2 With DynamicBlack™ High

Network Control

HD*3 DATAWIRELESS

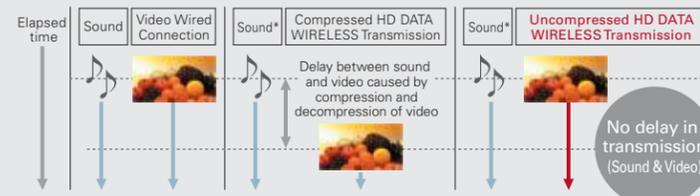

The Uncompressed HD*3 DATA WIRELESS Transmission System allows pure uncompressed data transmission without delays between the video and sound. Technology in wireless system allows uncompressed data even from distances of about 100 feet*4 away from the input source. Easier set-up for place such as large event halls and other large rooms/theaters as it eliminates the need to feed cables and run wires from sources to projectors.

HD Wireless Transmission System is sold as optional accessory for PDG-DHT100L.

*3 HD stands for high definition of 1080i or 720p *4 Actual Distance is dependent of a variety of environmental conditions

No delay between Video and Sound

*When using a separate amp speaker system other than sound out on projector
*The above is an image used only for explanation purposes

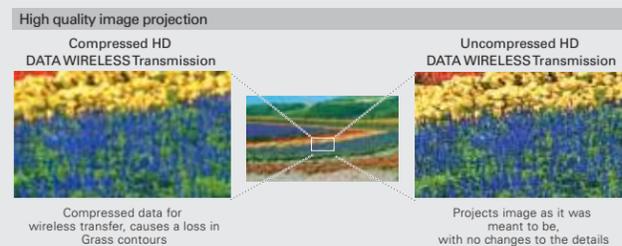

Featuring the PJ-Net Organizer Board

The PJ-Net Organizer board is provided as standard equipment, for centralized control of projectors over a wired network. Installing the optional PJ Master into a PC or server also lets you control the PJ-Net Organizer-mounted projectors over a network.

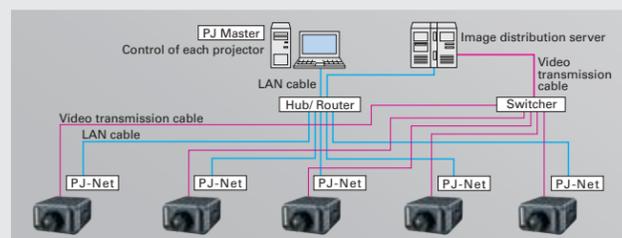

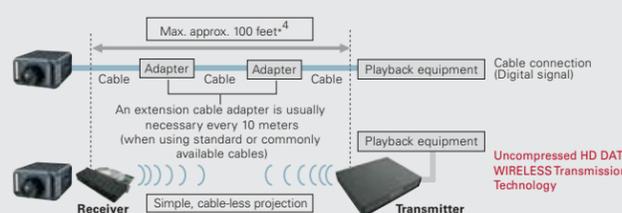

DICOM Simulation Mode

PDG-DET100L allows DICOM*1 simulation mode*2 and which can approximate an image to DICOM Part14 Grayscale Standard Display Function. This mode offers Clearbase and Bluebase DICOM simulation modes, and is helpful for use in medical institutions and education.

*1 Medical Imaging and Communications in Medicine (DICOM) is standard in medical imaging.
*2 Do not use for medical diagnosis.

Transmit Up to 100 feet*2 Wirelessly

Easy Maintenance

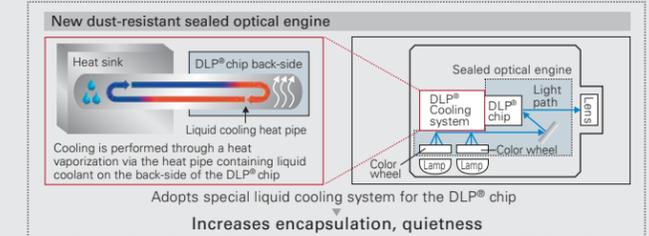

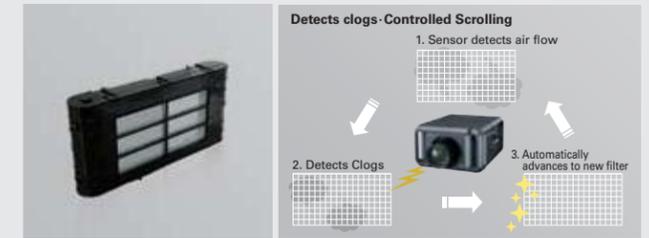

The Industry's longest-lasting*5 35,000 hour-use filter 'Active Maintenance Filter', for cleaner and highly durable projection

Equipped with replaceable 'Active Maintenance Filter' for the Industry's longest lasting*5 35,000 hour-use automatic reel filter cartridge to prevent dust from entering the lamp area, while still allowing enough airflow to help the area to remain cool longer durability and reliability from the increased dust resistance and longer lasting filters.

*5 As of the time of sales at the end of May, 2009 (when in Eco1 mode, Based on JIS D-0207 accelerated testing environment conditions) *25,000 hour-use (when in Normal mode, Based on JIS D-0207 accelerated testing environment conditions)

Equipped with new, dust-resistant sealed optical engine

New, improved sealed optical engine cooling design prevents dust build up, maintaining optimal brightness and contrast, problems that traditionally are difficult to overcome, causing reductions in projection quality Improved air control for more flexibility in using the projector in a variety of environments.

One-way Flow System

The PDG-DHT100L/DET100L is concentrated into one intake and one exhaust, both on the side, to solve dust-related problems and improve cooling reliability.

Easier Replacement

Lamp and Twin Color Wheel replacement has been simplified to make maintenance easier. Easy removal and replacement of the lamp from the top.

Versatile Installation

Edge Blending & Color Matching

Equipped with "Edge Blending" function that allows what feels like boundary-less images with multi-image display possibilities Built-in "Color Matching" function correcting variations in color reproduction when using more than one projector.

'Edge Blending' function allows what feels like boundary-less images with multi-image display possibilities

Power Lens Shift

Featuring both vertical and horizontal lens shift (vertical: 67%, horizontal: 41% (maximum)), the PDG-DHT100L enables intuitive operation for easy on-site setup. The lens shifts back to the center by pressing a lens shift button.

Interchangeable Lenses

Lens removal and attachment are also very easy.

Useful Features

- There is also a Mechanical Shutter System which is popular for a variety of elite professional uses. The amazing PDG-DHT100L/DET100L fill the needs of a host of demanding business venues including meeting, entertainment and promotional applications. It's a super nova in a star-studded selection of SANYO Portable projectors.

- "Lens center layout" symmetrical design
- Full light-up Control Panel & Remote Control

Vertical Tilt Angel Projection

Realizes vertical 360 degree tilt angle projection allowing projection positions from the ceiling or floor, breaking from traditional projection settings.

Picture-in-Picture mode and Picture-by-Picture mode

Capable of projecting two images simultaneously either using built-in picture-in-picture mode or picture-by-picture mode.
